About this Book	XXIX
About the Author	XXXIII
And so it Starts... An Introduction	XXXV
A Brief History of ITIL	XXXIX
1. ITIL – Holy Grail or Poisoned Chalice?	1
1.1. Introducing the Defendant	1
1.2. What is ITIL?	1
1.3. ISO 9000 – A Lesson for the IT Industry to Learn from.....	2
1.4. The Case for ITIL	2
1.5. The Case Against ITIL	4
1.6. The Jury is Still Out... ..	6
1.7. Closing Remarks and Verdict	6
2. BS 15000/ISO 20000 – Legitimising the ITSM Market...	9
2.1. Are Standards a Good Thing?	9
3. Aligning IT with the Business	11
3.1. What Do We Mean by Alignment?	11
3.2. How Aligned are You?	13
3.2.1. So How Did You Do?	15
3.2.2. The First Faltering Steps to IT Becoming Accepted as a Business Peer	15
3.3. 10 Things You Can Start Today to Get the Ball Rolling... ..	16
3.4. Is Alignment Good Enough?.....	18

3.5. Is Running IT as a Business Really the Same as Aligning IT with the Business?	18
4. What Keeps Your CxO up at Night?	19
5. Traditional IT Service Management Wisdom	23
5.1. Maturity Models and Waterfalls	23
5.2. Because Real Life doesn't Work That Way!	24
5.3. A Balanced Approach to ITSM	25
5.3.1. Operational Requirements	26
5.3.2. Reactive Capability	27
5.3.3. Improvement Focus	27
5.3.4. Overlaying Best Practice upon Our Balanced Approach	28
5.3.5. Service Definition – Part 1	29
5.4. A Balanced Best Practice Process Model	31
6. Enough of the Management Fads, Marketing Hype and Analyst Bluster	33
6.1. Does Anyone Really Do this Stuff?	33
6.1.1. What's in it for me? And by that, I of Course Mean you the Reader	33
6.2. Benefits of IT Service Management	34
6.3. Details/Examples of ITSM Benefits	35
6.3.1. Quantitive and Qualative Benefits of ITSM ...	42
6.3.2. Return on Investment (ROI)	43
7. ITSM – A Definition	45
7.1. Mmmmm...not the Most Useful Definition in the World	45
7.2. So Much Talk of 'Management' but so Little Evidence of it	46
8. The "Service" Part of ITSM	49
8.1. What do we Mean by the Term "Service"?	49
8.2. Components/Elements of a Service	50
8.2.1. Users/Audience	50
8.2.2. User Requirements/Expectations	52
8.2.3. Deliverables	53
8.2.4. Information/Input to be Supplied by User ...	54
8.2.5. Mechanisms for Access/Delivery	55
8.2.6. Resources/Roles Responsible for Delivery ...	56
8.2.7. Contractual Requirements	59
8.2.8. Metrics	60
8.2.9. Service Availability	66

8.2.10. Service Capacity	66
8.2.11. Service Level Requirements.....	68
8.2.12. Security Requirements	70
8.2.13. Cost Allocation/Charge Backs	71
8.3. Service Definition	72
8.3.1. How the Service is Defined	72
8.3.2. Requirements Capture - The Difference Between Requirements and Specifications ...	73
8.3.3. Capability Assessment	73
8.3.4. Story Boards, Scenarios and Flow Diagrams ..	74
8.3.5. Review of Existing Documentation/Processes .	74
8.3.6. Drafts, Reviews and Pilots	74
8.3.7. Sizing and Implementation Planning.....	74
8.3.8. Who should Participate?	75
8.3.9. Review Cycles	75
8.3.10. Process/Procedures to Change a Service Definition	75
8.3.11. Disputes	76
9. Defining Meaningful IT Services	77
9.1. Common Service Models	77
9.1.1. Traditional Functional or Technical Based Models.....	77
9.1.2. Systems Based Models	78
9.1.3. Business Oriented Service Models	78
9.1.4. Separating the Service from the Support (or Vice Versa)	79
9.1.5. Ongoing Usage/Subliminal Services	79
9.1.6. Transactional Services	79
9.1.7. Role Based Service Models	79
9.2. What's in a Name?.....	80
9.3. Differences Between Internal and External Facing Services	80
9.4. Service – a Definition	80
10. The IT Service Catalogue/Service Portfolio	81
10.1. Entitlement	83
10.2. More than a Dusty Folder on the Shelf!	84
10.3. Common Problems with Service Catalogues/Service Definitions	85
11. ITSM Disciplines Explained	87

12. Self Service	89
12.1. Objectives of Self Service	90
12.2. Common Issues	90
12.3. Elements of a Self Service System	91
12.3.1. Bulletin Boards/Broadcast Information Provision	91
12.3.2. Context Sensitive Personalised Content	91
12.3.3. Service Subscription Interface	92
12.3.4. Request Logging and Tracking	92
12.3.5. FAQs, Solutions Database, Knowledgebase etc	92
12.3.6. Satisfaction Surveys	93
12.3.7. Suggestion Box	93
12.3.8. Self Healing Capabilities	93
12.3.9. Self Service Requisitions/Software Downloads	94
12.3.10. Call me Back	94
12.3.11. Training Portal Links	94
12.4. Usability is Key	94
12.5. The “I Want ...” Box	95
12.6. Shifting the User Mind Set	96
12.7. Is Self Service Always Appropriate?	96
13. Interaction Management	97
13.1. Process Objectives	98
13.1.1. Effective Routing and Processing of Inbound and Outbound Communications	98
13.1.2. Provision of Interaction Information to all Persons Working with a Contact to Ensure Service Consistency etc	98
13.2. Common Issues	99
13.3. Process Flow	100
13.4. Key Players	101
13.5. Process Metrics	101
14. Request Management	103
14.1. Process Objectives	104
14.1.1. Efficient Handling of Requests for Service(s)/Assistance	104
14.1.2. Accurate Routing of Requests to the Relevant People/Groups	104
14.1.3. Provision of Closed Loop Feedback (e.g. Status Updates/Information to Requesters)	105
14.2. Common Issues	105
14.3. Process Flow	105
14.4. Key Players	106
14.5. Process Metrics	106

14.6. What is the Difference Between a Service Request and an Incident?	106
14.6.1. Requests as a Type of Incident	107
14.7. Common Request Types	107
14.8. Request Management and the Change Management Process	108
14.8.1. Request Management Sub-processes	108
14.9. Triage	108
14.10. Scripting	109
14.10.1. VBscript, Javascript, Python, Perl etc?	109
14.10.2. Why Script?.....	109
14.10.3. But that’s not what you’re Supposed to Say! .	110
15. Incident Management	111
15.1. Process Objectives	112
15.1.1. Rapid Restoration of Service to the Agreed Predefined Level	112
15.1.2. Minimising Overall Disruption to the Business	112
15.1.3. Implementation of Permanent Fixes in Preference to Workarounds	113
15.1.4. First Time Fixes/Resolutions (Minimising the Number of Interactions Needed to Resolve an Incident)	113
15.1.5. Minimising the Number of Incidents that Need to be Re-opened	113
15.2. Common Issues	113
15.3. Process Flow	114
15.4. Key Players	115
15.5. Process Metrics	116
15.5.1. Graphical Representations of Performance Data – Bringing the Figures to Life.....	117
15.6. Categorisation	118
15.6.1. Categorisation Types	118
15.6.2. When to Categorise	120
15.6.3. Reason for Categorization	122
15.6.4. Common Categorisation Mistakes	123
15.7. Prioritisation	124
15.7.1. Why Prioritise?	127
15.7.2. Common Problems with Incident Prioritisation	127
15.7.3. A Crude Approximation of Incident Priority...	129
15.8. Incident Status Model	130
15.8.1. Enemy of the State... ..	131
15.8.2. One Size Fits All.....	131
15.8.3. State Transition Rules	131

15.9. Assignment, Ownership, Responsibility and Accountability	131
15.9.1. Automatic Assignment vs. Self managed Teams/Self Selection.....	132
15.9.2. Unfortunately, Self Selection can have its Problems.	133
15.9.3. Automatic Assignment Methods	134
15.9.4. Short List Selection	134
15.9.5. And the Winner is... Refining the Shortlist ..	136
15.9.6. Ownership vs. Assignment	137
15.9.7. Responsibility vs. Accountability	137
15.9.8. Three Strikes and you're Out!	137
15.10. At your Service... ..	138
15.11. Piff Paff Puff! Magic Happens here!	138
15.11.1. Everybody Lies	139
15.11.2. Nobody Listens	139
15.11.3. If You don't Ask the Right Questions, You won't Get the Right Answers	140
15.11.4. Be Careful What You Ask, they Might Just Answer You	140
15.12. Incident Diagnostic Techniques	141
15.12.1. Have You Turned it off and Turned it on Again?.....	141
15.12.2. We have been Placed in a Holding Pattern at 30,000 ft.....	141
15.12.3. Snap!.....	141
15.12.4. The Spanish Inquisition.....	142
15.12.5. Spot the Difference.....	142
15.12.6. Newtonian Physics	142
15.12.7. Log, Look and Refer.....	142
15.12.8. There is a Better Way.....	143
15.12.9. Perfecting Your Bed Side Manner	144
15.13. Notifications – Needing to Know What You Need to Know.....	145
15.13.1. Less is More.....	146
15.13.2. Registering an Interest	146
15.14. Incident Management Aides	146
15.14.1. Predefined Response Plans/Remedial Action Plans	146
15.14.2. Remote Control.....	147
15.14.3. Black Box Recorders	148
15.14.4. Self-healing Systems	148
15.14.5. Event Management/Intelligent Agents	148
15.15. Workarounds, Fixes and Resolution	149
15.15.1. When does a Workaround become a Fix?	150

15.15.2. Is an Incident that is ‘Resolved’ by a Workaround Really Resolved?.....	150
15.15.3. Closing the Workaround Loophole.....	150
15.15.4. When can a Resolved Incident be Closed?	151
15.15.5. Closure Codes	151
15.16. Follow up Actions – Closing the Stable Door.....	151
15.16.1. Do Nothing – Part 1	151
15.16.2. Escalate it to a Higher Level	151
15.16.3. Do Nothing – Part 2	152
15.16.4. Raise a Change Request	152
15.16.5. Request a Problem Investigation	152
15.16.6. Identify it as a ‘Known Error’	152
15.17. Parent Incidents and their Children	153
15.17.1. Automatic Closure of Child Tickets upon Resolution of the Parent	153
15.18. “Near Miss” Management?	153
15.19. Major Incident Planning	153
15.20. Is a Help Desk Really a Commodity Item?	154
16. Knowledge Management.....	155
16.1. Process Objectives	156
16.1.1. Quick and Easy Access to Pertinent Information	156
16.1.2. To Prevent Corporate Knowledge Loss when Personnel Leave the Business	156
16.1.3. Reduce the Time Taken, and Number of Interactions Required, to Diagnose and Resolve Incidents.....	157
16.2. Common Issues	157
16.3. Key Players	157
16.3.1. Process Metrics	158
16.4. Elements of a Knowledge Management Solution.....	158
16.4.1. Content.....	158
16.4.2. Search	159
16.4.3. Approval Process	160
16.4.4. Ongoing Maintenance	160
16.4.5. Solution Usage Tracking	160
16.4.6. Feedback Loop	160
16.5. Approaches to Content Creation	161
16.5.1. Dedicated Teams.....	161
16.5.2. Bonus Incentives i.e. Pay per Clue.....	161
16.5.3. Peer Review and Community Credibility	161

17. Problem Management	163
17.1. Process Objectives	164
17.1.1. Incident/Outage Avoidance	164
17.1.2. Improve Service Reliability and Performance to Levels Required by the Business	165
17.1.3. Prevent Recurrence of Issues	165
17.1.4. Identification of Known Errors/Probable Causes	165
17.1.5. Process Improvement	165
17.2. Common Issues	166
17.3. Process Flow	166
17.4. Key Players	167
17.5. Process Metrics	167
17.6. The Problem with Problem Management....	167
17.6.1. Witch Hunt vs. Prevention	167
17.6.2. What's in a Name? A Rose by any other Name would Smell as Sweet	168
17.6.3. Cultural Shift	168
17.6.4. Changing Perception is one of the Most Difficult Changes of All!	168
17.6.5. The Lack of Tools	169
17.7. Problem Selection	169
17.7.1. Statistical Analysis	169
17.7.2. Automated Potential Problem Suggestion	170
17.7.3. Biggest Problem Lists from Departmental Heads.....	170
17.7.4. User Requests/Improvement Suggestions	170
17.7.5. Management Sponsorship	170
17.7.6. Major Incidents	171
17.7.7. Risk Assessment	171
17.7.8. Qualative vs. Quantative Evidence	171
17.8. Problem Analysis	171
17.8.1. Root Cause Analysis	171
17.8.2. Known Knowns, Known Unknowns and Unknown Unknowns	172
17.8.3. Guilty by Association	172
17.8.4. Trying to Know the Known Unknowns... Data Collection	173
17.8.5. You can Feel it in your Water	173
17.8.6. Failure Assurance	173
17.9. Trend Analysis	173
17.9.1. You may Know More than you Think you do	174
17.9.2. Standard Tests	174
17.10. Statistics and IT	174

17.10.1. Statistical Process Control (SPC)	175
17.10.2. Control Charts	176
17.11. The Usual Suspects	177
17.12. Testing Your Hypothesis	179
17.13. Removing the Root	179
17.14. Preventing the Preventable	180
17.14.1. Just Because you Could, doesn't Mean you should or would	180
17.15. Preventive Action Plans – Putting the Theory into Practice	180
17.15.1. Defining Success Criteria	180
17.15.2. Raise a Change Request	181
17.15.3. Document a 'Known Error'	181
17.15.4. Change the Focus of Event Management/Systems Monitoring	181
17.15.5. Refine Control Chart Thresholds, Sampling Methods and Analytical Models	182
17.15.6. User Based Initiatives – Education, Awareness etc	182
17.16. Measuring the Effectiveness of Preventive Actions ...	183
17.17. But What Happens if a Root Cause cannot be Found?	183
18. Change Management	185
18.1. Process Objectives	186
18.1.1. Efficient and Error Free Implementation of Changes to Assets and Processes	186
18.1.2. Minimising the Level of Service Disruption ...	186
18.2. Common Issues	187
18.3. Process Flow	187
18.4. Key Players	188
18.5. Process Metrics	188
18.6. What is the Change Trying to Achieve?	189
18.6.1. Conflicting Requirements of Various Change Types	189
18.6.2. Like for Like Replacement	190
18.6.3. Comparable Replacement	191
18.6.4. Upgrade Component (i.e. Removal and Addition)	191
18.6.5. Downgrade Component (i.e. Removal and Addition)	191
18.6.6. Addition	191
18.6.7. Removal	191
18.6.8. Modification - Meta Data	191
18.6.9. Modification - Configuration Change	192
18.6.10. New Installation	192

18.6.11. Move	193
18.7. Arbitrary Change Classifications/Descriptions	
can be Dangerous	193
18.7.1. Standard Changes	194
18.7.2. Minor, Major and Significant Changes	194
18.7.3. Determining the Classification of a Change Request	194
18.7.4. Automation Just Compounds the Problem ...	195
18.7.5. Standard Change Models/Task Templates ...	195
18.8. All Changes are Created Equal	196
18.9. If you don't Ask, you don't Get – Approval Processes.	197
18.9.1. Types of Approval Process Flows	198
18.9.2. Types of Approval Response	198
18.9.3. Time Limited Approval Cycles – Rescinding the Infinite Right of Appeal	199
18.9.4. Information Pack for Approvers	199
18.9.5. Who Should Approve?	200
18.9.6. Peer Review	201
18.9.7. The Change Approval Board (CAB)	201
18.9.8. Automatic Approvals	201
18.10. “Measure Twice, Cut Once” – Or Planning is your Friend	202
18.10.1. Planning – a Task by Itself	202
18.10.2. Tasks, Owners/Assignees and Dependencies ..	202
18.10.3. Task Granularity – How Much Detail is too Much?	202
18.10.4. Task Validation	203
18.10.5. Task Assignment	203
18.10.6. Gantt Charts and PERT Network Diagrams ..	203
18.10.7. Scheduling the Job	204
18.10.8. Combining Similar Jobs to Reduce Duplicated Tasks	204
18.11. Change Calendar	204
18.11.1. “What if” Scenario Planning	205
18.11.2. Change Blackout Periods	205
18.11.3. Release Selection	206
18.12. Risk Management	206
18.12.1. Risk Assessment – as Easy as ‘ABC’ ... Followed by ‘D’ and ‘E’	206
18.12.2. Hazards	206
18.12.3. Risk	207
18.12.4. Severity	207
18.12.5. Scope	207
18.12.6. Likelihood	208

- 18.12.7. Common Risks Associated with IT Changes and IT Projects 208
- 18.12.8. Controls 209
- 18.12.9. Effectiveness of Defined Control Measures 210
- 18.12.10. Residual Risk 210
- 18.12.11. Everything Changes 210
- 18.13. Practice Makes Perfect - Dress Rehearsals and Testing 211
 - 18.13.1. Virtualisation and Testing 211
 - 18.13.2. Plan B (i.e. Back-out Plan) 212
- 18.14. Change Control 212
 - 18.14.1. Ongoing Risk Assessment Activity 212
 - 18.14.2. When the Worst Case Scenario Happens... .. 213
- 18.15. The Benefits of 20:20 Hindsight 213
 - 18.15.1. “We’d Like to Keep you in for Observation Overnight” 213
 - 18.15.2. Side Effects 213
 - 18.15.3. The Post Mortem/Post Implementation Review (PIR) 214
- 18.16. Learning the Change Management Lessons of Industry 215
 - 18.16.1. So how are Changes Treated in Non-IT Scenarios? 216
 - 18.16.2. That’s all Well and Good but it’ll Never Work in IT... 221
 - 18.16.3. Conclusion 222
- 18.17. Selling the Benefits of Change 222
 - 18.17.1. The Single Biggest Obstacle to Change is People’s Resistance... 222
 - 18.17.2. Identifying WIFMs (“What’s in it for me”s) .. 223
- 18.18. Automated Provisioning – Change Management Nirvana? 223
- 18.19. Which Comes First; the Change or the CMDB update? 224
- 18.20. Change Management and Release Management 224

19. Asset Lifecycle Management/Configuration

- Management** 225
 - 19.1. Process Objectives 226
 - 19.1.1. Extracting the Maximum Return from every Asset for the Minimum Cost 226
 - 19.1.2. Extending Asset Life 226
 - 19.1.3. Understanding the Relationships and Dependencies within the IT Environment ... 226
 - 19.1.4. Improving Asset Reliability and Availability .. 227
 - 19.2. Common Issues 227
 - 19.3. Process Flows 228
 - 19.4. Key Players 228

19.5. Process Metrics	229
19.6. Asset Lifecycle Management and Configuration Management	229
19.7. The Configuration Item (CI)	229
19.7.1. Defining the Appropriate Level of Granularity	231
19.7.2. Common CI Attributes and Specific Characteristics	231
19.7.3. Specific Characteristics – Getting Personal ...	232
19.7.4. Dynamic Data Models	232
19.7.5. Core CI Relationships	233
19.7.6. Secondary Relationships	233
19.7.7. Indirect Relationships	233
19.7.8. CI Classification	234
19.7.9. CI Lifecycles/Status Models	234
19.7.10. Cookie Cutter Fun – The CI Catalogue	235
19.8. The Configuration Management Database (CMDB) ..	236
19.8.1. I am Spartacus... no, I am Spartacus... ..	236
19.8.2. A Filing Cabinet by any Other Name would Hold as Much!	236
19.8.3. The Emperor’s New Clothes	236
19.8.4. Data! Data! Data Everywhere	237
19.8.5. Having One’s Cake and Eating it	237
19.8.6. Trusted Sources and Data Confidence	238
19.8.7. Populating the CMDB	238
19.8.8. Leveraging the CMDB – i.e. using it	239
19.8.9. Common CMDB Related Issues	239
19.9. Meet the Parents... It’s all Relative	240
19.10. Elements of a Relationship	241
19.10.1. Relationship Type	241
19.10.2. Ratio	242
19.10.3. Uniqueness/Exclusivity	242
19.10.4. Direction	242
19.10.5. Initiation and Expiration Date/Time	243
19.10.6. Impact Effect	243
19.10.7. Impact Calculation Rules	243
19.10.8. Weighting Factors/Contribution to Capacity ..	244
19.11. Configuration Management	244
19.12. Automated Discovery	245
19.12.1. Horses for Courses	245
19.12.2. Configuration Discovery	246
19.12.3. Topology Discovery	246
19.12.4. Security Discovery (Systems Administration/Vulnerability Testing)	246
19.12.5. Frequency of Discovery Sweeps/Audits	246
19.13. Reconciliation – Turning Data into Information	247

19.13.1. Manual Reconciliation (Walk Around Audits, Inventory Checks, Stock Counts etc)	248
19.13.2. Exception Handling	248
19.14. Asset Lifecycle Management – From Soup to Nuts	249
19.14.1. Need Identification/Requirements Analysis	249
19.14.2. The Black Art of Hardware Sizing and Selection	250
19.14.3. Procurement	250
19.14.4. Goods Receipt	251
19.14.5. Inventory Management	252
19.14.6. Storage and Transportation	253
19.14.7. Commissioning	253
19.14.8. Normal Operations	253
19.14.9. Performance Monitoring	254
19.14.10. Utilisation Measurement	254
19.14.11. Rationalisation Planning	254
19.14.12. Migration Planning	254
19.15. Preventive Maintenance	255
19.15.1. Condition Based Scheduling	255
19.15.2. A Manager of Managers	257
19.16. Ongoing Viability Assessment	257
19.16.1. Estimating the Projected Remaining Useful Life	258
19.16.2. Defining an Upgrade Path	259
19.17. Stop the Upgrade Merry go Round – I Want to Get Off!	259
19.18. Decommissioning	259
19.18.1. Lease Returns	260
19.18.2. End of Life Planning	260
19.19. Cradle to Grave is no Longer Enough	260
19.19.1. Environmental Impact and Safe Disposal	260
19.20. RFID and Asset Management	261
19.21. Linear Assets and IT	261
19.22. Don't Forget to Play "NICE"ly Children	262
20. Software License Management	263
20.1. A Common Understanding of Software License Management	263
20.1.1. Potential Benefits of Effective Software License Management	264
20.1.2. Challenges Associated with Software License Management	265
20.2. Steps to Software License Management	265
20.3. Elements of a Software License Management Solution	267

20.4. Features and Functionality of an Effective Software Asset Repository	269
20.5. To Serialize or not to Serialize...	271
20.5.1. Software Instances Treated as an Inventory Item	272
20.5.2. Software Instances Treated as a Serialized Asset	272
20.5.3. Hybrid Solution where Software is Treated as either an Inventory Item or a Serialized Asset	273
21. Service Level Management	275
21.1. Process Objectives	276
21.1.1. Ensure Service Delivery Performance is within Defined and Agreed Limits	276
21.1.2. Prevention of SLA Breaches	276
21.1.3. Identification and Monitoring of Key Performance Indicators (KPIs)	277
21.1.4. Provision of Information to the Service Design Function to Enable Service Quality to be Improved.....	277
21.2. Common Issues	277
21.3. Process Flow	278
21.4. Key Players	279
21.5. Process Metrics	279
21.6. SLAs, OLAs and UPCs – Jargon that Helps?	279
21.6.1. SLAs – A stick to Beat the Delivery Team with or a Tool for Service Improvement?	279
21.6.2. Kicking them when their Down – Rolling SLA Periods	280
21.7. Elements of a Service Level Agreement	281
21.7.1. Objective(s) of the SLA.....	281
21.7.2. Focus of the SLA	282
21.7.3. SLA Reporting Periods	282
21.7.4. Crossing Reporting Thresholds – What’s in and What’s out.....	282
21.7.5. Validation Triggers	284
21.7.6. Monitoring Frequency	284
21.7.7. Escalation Process	285
21.7.8. Escalation Thresholds	285
21.7.9. Escalation Actions	286
21.7.10. Starting the “Stop the Clock” Function	286
21.7.11. Resuming the SLA after “Restarting the clock”	288
21.7.12. Stand Clear of the Doors when the Train is in Motion.....	288

21.8. Dynamic SLAs	288
21.8.1. Closing the Stable Door before the Horse has a Chance to Bolt	288
21.8.2. No Crystal Ball Required	288
21.8.3. Predictive Models for Service Usage	290
21.8.4. Who Needs a Predictive Model Anyway?	291
21.8.5. The Dangers of Diverting Resources to a Failing SLA	291
21.9. The Three Pillars of Service Quality Measurement ...	291
21.9.1. Responsiveness	292
21.9.2. Availability	292
21.9.3. Quality of Service	292
21.10. Pulling it all Together – Aggregated SLAs	293
21.11. Agreed Service Levels – Resisting the Temptation to Over Deliver	293
21.12. Service Quality Perception and the Sample of One....	294
21.13. Traffic Lights	295
21.14. Developing Meaningful Metrics that Help Improve Service Quality	295
21.15. Management by Numbers is a Self Fulfilling Prophecy – People Cheat!	296
22. Release Management	297
22.1. Project Management and Programme Management – an Analogy	298
22.2. Process Objectives	299
22.2.1. Efficient and Error Free Implementation of Changes to Assets and Processes	299
22.2.2. Minimising the Level of Service Disruption ...	300
22.3. Common Issues	300
22.4. Key Players	300
22.5. Release? More Like a “Controlled” Escape!	301
22.5.1. Types of Release	301
22.6. Release Management as ITs Last Line of Defence ...	302
22.6.1. Multiple Environments Help Minimise Mistakes	302
22.6.2. Packaging	303
22.6.3. Acceptance Criteria	303
22.6.4. Release Management as a Whistleblower	304
22.7. Software Development Releases	304
22.8. Common Release Strategies	304
22.8.1. Parallel Running/Dual Operation	305
22.8.2. Stepped/Staggered Implementation	305
22.8.3. Big Bang/Damp Squib	305
22.8.4. Shelf Update/On Demand	306
22.8.5. Pilot Schemes/Proof of Concept Deployment .	306

22.8.6. System Cutover	306
22.9. Release Activities	307
22.9.1. Pre-release Activities and Planning	307
22.9.2. Activities Required During the Release	308
22.9.3. Post Release Activities and Planning	310
22.10. When should a Single Change be Treated as a Release?	310
22.11. How should the Contents of a Release be Selected? . . .	310
22.12. Does a Release have to be “Finished” to be “Complete”?	311
23. Availability and Capacity Management – The Black Sheep of the ITIL Family	313
23.1. Sphere of Influence and Sphere of Control	314
23.2. Availability Management	314
23.2.1. Process Objectives	314
23.2.2. Common Issues	314
23.3. Capacity Management	315
23.3.1. Process Objectives	315
23.3.2. Common Issues	315
24. The Current State of the ITSM Solution Market	317
24.1. General Industry Trends	318
24.1.1. Consolidation Within a Mature Market	319
24.1.2. Just because it is a Market Leader doesn’t Mean that it is the Best Solution for you	320
24.1.3. The Good, the Bad and the Ugly	320
24.1.4. ITIL is the Price of Admission not the Game Itself	320
24.1.5. ITIL Compliance should be More than Just Ticking the Boxes	320
24.1.6. Innovation is Dead, Long Live the Analysts . .	321
25. Crystal Ball Time . . . The Future of the ITSM Space	323
25.1. If ITIL is Only the Beginning, Where or What Next? .	323
25.1.1. Potential Future Trends in (IT)SM	323
25.1.2. Back to Basics	323
25.1.3. Everything Else is Just a Variation Upon a Theme.	324
25.1.4. But won’t Common/Shared Process Models Mean that Everything will become the Grey Goey Gunk of Nano-technology Nightmares?	324

25.2. Cross Discipline Approaches Continue to Blur Towards a True Consolidated Service Desk (CSD)	324
25.3. Applying (IT)SM Principles to Every Asset Class	326
25.4. The Line Between Internal and External Support Processes Continues to Blur Further	326
25.5. Convergence of CRM and ITSM Concepts to Define True Service Management	326
25.5.1. User Profiling	327
25.5.2. Expectation Management	327
25.5.3. Demand Modelling	327
25.5.4. Product/Service Configuration Tools	328
25.5.5. Campaign Management	328
25.6. Extending the Scope of ITSM to Incorporate Additional Areas	328
25.7. Business Intelligence Moves Beyond Basic Statistics and Embraces SPC	330
25.8. Reactive Capabilities become Proactive and then pre-emptive	330
